Event programme

09.30	<i>Registration, coffee and Design Showcase – Conference Centre, 1st Floor Including photo exhibition and exhibition stands</i>
10.30	Welcome Sara Marsh, Chair of SCONUL and Director of Learner Support Services, University of Bradford Studio Theatre, Ground Floor
10.35	Awards ceremony Presented by Liz Waller, Chair of the SCONUL Building Design Group and Deputy Director Information, University of York
11.00	Keynote speech followed by questions Sofia Pereira, Architect, Mecanoo Architecten and architect of the Library of Birmingham
11.45	<i>Coffee break – Conference Centre, 1st Floor</i>
12.15	Augustine House Library and Student Services Centre, Canterbury Christ Church University Presentation and Q&A Pete Ryan, Head of Library Services, Canterbury Christ Church University
13.00	<i>Lunch and Design Showcase – Conference Centre, 1st Floor Photo exhibition and exhibition stands, plus</i> <i>13.20: Presentation, Bruynzeel Storage Systems, Meeting Room 102, Conference Centre Storage and archiving in modern libraries: a design-led approach</i>
14.00	The McClay Library, Queen’s University Belfast Presentation and Q&A Elizabeth Traynor, Assistant Director (Library Services), Queen's University Belfast
14.45	<i>Coffee break and Design Showcase – Conference Centre, 1st Floor Photo exhibition and exhibition stands, plus</i> <i>14.50: Presentation, ADP Architects, Meeting Room 102, Conference Centre Working in Augustine House Library and Student Services Centre: space planning, furniture choice and the quality of interior</i>
15.30	Ayr Library, University of the West of Scotland and SRUC Presentation and Q&A Neal Buchanan, Campus Librarian (Ayr), University of the West of Scotland
16.15	Conclusions Liz Jolly, Vice-Chair of SCONUL and Director, Library and Information Services, Teesside University
16.30	Close and departure

AWARD WINNING LIBRARY DESIGN BY ADP

Augustine House at Canterbury Christ Church University wins the SCONUL Library Design Award

We have been at the forefront of user-centred design in higher education since 1965, and have worked with over 25% of all HEIs in the UK.

You can find out more about the design for Augustine House from Pete Ryan, Head of Library Services at Canterbury Christ Church, in his presentation at 12:15 or at ADP's Design Showcase in the coffee break at 2:45, room 102.

Come and meet those involved at our stand and enter our prize draw!

WWW.ADP-ARCHITECTURE.COM

Design Awards and Showcase Event and venue information

Venue information

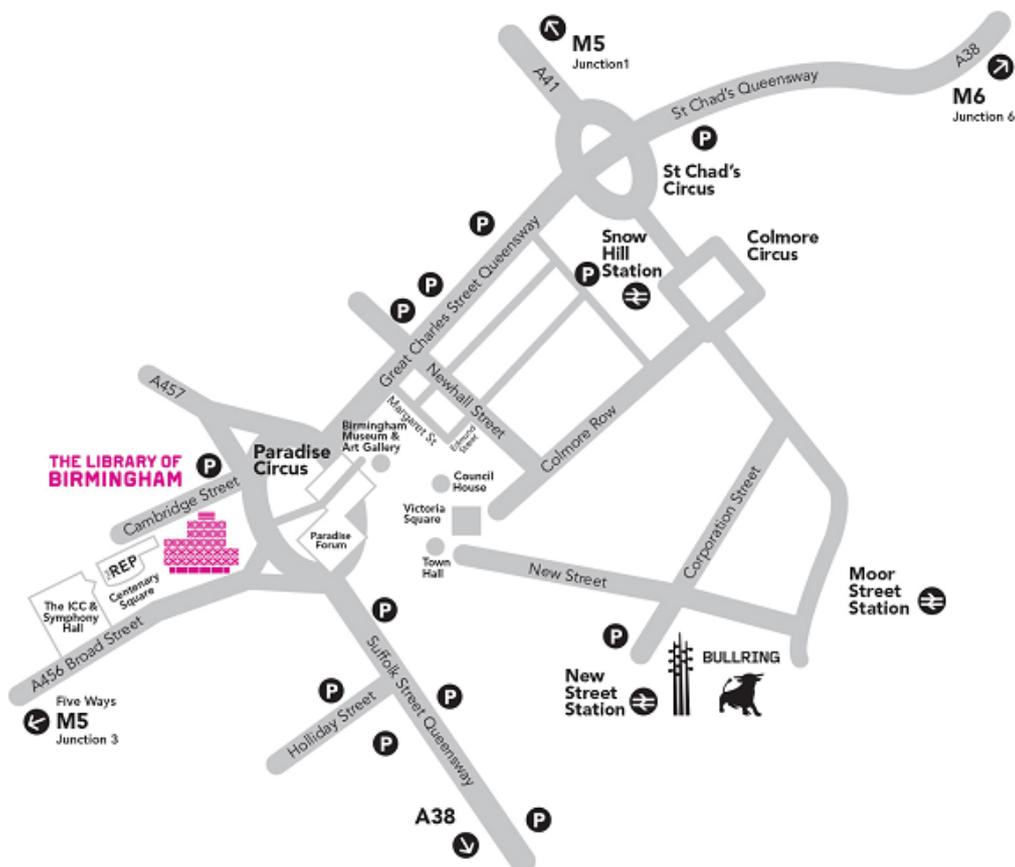

The SCONUL Library Design Awards and Showcase will take place in the Studio Theatre (on the ground floor) and Conference Centre (first floor) at the Library of Birmingham.

On arrival coffee and refreshments will be served in the Conference Centre on the first floor, in Meeting Rooms 101-105. The Design Awards ceremony will be held in the Studio Theatre on the ground floor.

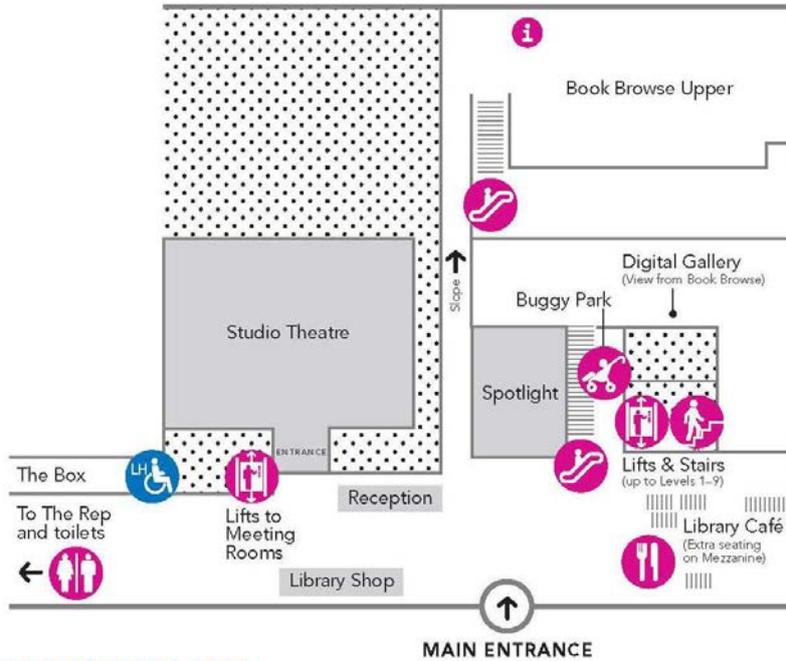

Getting to the Conference Centre

Library of Birmingham
Centenary Square
Broad Street
Birmingham
B1 2ND

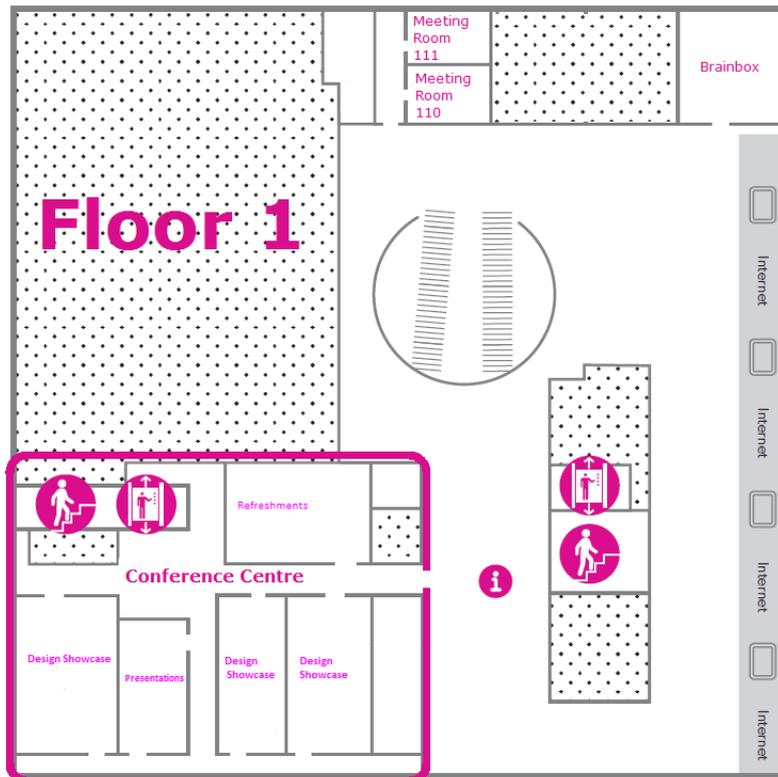

www.libraryofbirmingham.com

Map of the Conference Centre

GROUND FLOOR

Using wifi in the Library of Birmingham

Free wifi connectivity is available throughout the Library of Birmingham for use with your laptops and portable devices.

Unfortunately, there is limited access within the Studio Theatre where we will be holding our presentations. Access on terraces/outside spaces is, at the moment, also limited.

The Library of Birmingham offers a choice of two wifi networks 'Visitors' and 'Members'.

You should log-in as a visitor, using the network Visitors_Library_of_Birmingham.

- When you first select this option you will be taken to a login screen with a button asking if you want to "Get Online".
- The next screen asks for a first and last name and email address. Once all these details have been submitted the visitors' wifi page displays.
- This is the only time you will need to do this. You may be asked to sign onto the network again but you will be redirected to the Library of Birmingham wifi page, without having to re-enter your details.
- **You will automatically be logged off after 3 hours, but may log in again if needed.**

All PCs and wifi have a limit of 3 hour sessions. This is to allow for rest time and comply with health and safety specifications.

Design Showcase

The Design Showcase is taking place in the Conference Centre on the 1st floor and has a number of elements:

- **Photo exhibition** of the winning libraries
- **Exhibition stands** from library design suppliers
- **Time to visit the Library of Birmingham.** Unfortunately the Library does not offer tours of the building but delegates are welcome to explore the building during the Design Showcase timeslots. A tour of the non-public areas of the building was made available for a small number of delegates which is taking place at 9.30am.
- **Presentations on design issues.** Two exhibitors are putting on short (30 minute) presentations for delegates in Meeting Room 102 within the Conference Centre on the 1st floor. Spaces are available on a first-come, first-served basis. Please feel free to take coffee or lunch into the presentations.

13.20 **Storage and archiving in modern libraries: a design-led approach**

How a design-led approach can deliver elegant, successful storage solutions within a modern library. Featuring a presentation on Bruynzeel Storage System's installation at the Library of Birmingham, including:

- Jacob Jensen's Shade design for Bruynzeel
- space saving two-tier storage system with integrated upper floor
- electronic and manual mobile shelving
- future proofing of installation on Level 2
- bespoke solutions for archive objects and books

The video and presentation will be hosted by Bruynzeel Storage Systems' Morten Anderson. Anderson pioneered the introduction of electronic mobile storage in the UK, and played a leading role in bringing the Jacob Jensen Shade design to market. There will be an opportunity to ask questions at the end of the presentation.

14.50 **Working in Augustine House Library and Student Services Centre:
space planning, furniture choice and the quality of interior**

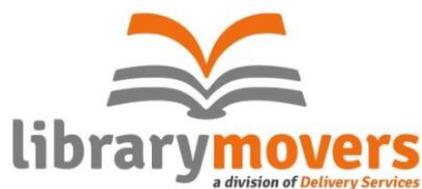

Augustine House architect Roger FitzGerald, Partner at ADP, will describe how they worked with the University and stakeholders in developing the brief for the library and student services centre. Mark Ridgewell, ADP's Interior Design Director, will outline how they explored space planning, furniture choice and the quality of the interior to deliver the up-to-date facilities a library should expect in the twenty-first century.

Are you planning a library move?

For expert advice on planning your relocation project talk to us at the SCONUL Conference

What we do...

book move consultancy
project management
space planning
book move implementation
special collections
separation and integration
packing and storage
and more...

Congratulations to the McClay Library, Queens University, Belfast, joint winners of the SCONUL Library Design Awards

Design Awards and Showcase Speaker biographies

Speaker biographies in order of appearance

Sara Marsh

Director of Learner Support Services, University of Bradford

Sara joined the University of Bradford as Director of Learner Support Services in summer 2007, and she currently has responsibility for the Library, IT, Careers, Disability and Counselling services. She was previously Deputy Director of Library and Information Services at Swansea University.

Sara has been Chair of SCONUL since summer 2012, and is currently one of three SCONUL representatives working with Jisc, UCISA, RUGIT and RLUK on the 'Futures Forum' series of partnership projects.

Liz Waller

Deputy Director of Information, University of York

Liz Waller is Deputy Director for Information and Head of Information Services at the University of York. She took up this post in 2009. An English graduate from Leeds University, with an MA from Leeds Polytechnic, she has over 23 years' experience of library work in the Higher Education sector. She has expertise in information literacy and graduate skills and, whilst at Leeds Metropolitan University, held an institutional teaching fellowship.

Liz has published in the areas of skills development and space planning. Liz went to York from the post of Head of Public Service Strategy at the University of Leeds, where she again had responsibility for estates planning, refurbishing the Health Sciences Library there in 2007-2008.

At York, Liz leads the Information Services Team and in 2012 completed the extensive refurbishment and extension to the University Library there. Her current areas of interest include Research Data Management. A member of the SCONUL User Experience and Success Strategy Group, Liz led the SCONUL Buildings Award 2013.

Sofia Pereira
Architect, Mecanoo Architecten

Sofia Rodrigues Pereira is an architect, graduating in 2007 from the Faculty of Architecture of the University of Lisbon. Since her graduation she has been working in The Netherlands for Mecanoo Architecten. She has been involved in a variety of large scale projects worldwide, such as the Library of Birmingham.

She had an important role in the Library project development in which she participated from design through to the construction phase.

Pete Ryan
Head of Library Services, Canterbury Christ Church University

Pete Ryan is Head of Library Services for Canterbury Christ Church University (CCCU). He has held a number of managerial positions within the public library service prior to his appointment at the University in 2002. At a national level he had been an active committee member of the Public Libraries Group of Chartered Institute of Library and Information Professionals (CILIP) (with 5 years as Treasurer), and is currently a member of the User Experience and Success Strategy Group of SCONUL. He has been actively involved in regional library

developments and was a member of the Steering Group of the M25 Consortium of Higher Education Libraries, during which time he had responsibility for co-ordinating the production of consortium's Annual Report. At a local level, he has been the chair for the Canterbury Circle of Libraries, a local consortium of public, HE, FE, school and special libraries within the Canterbury district.

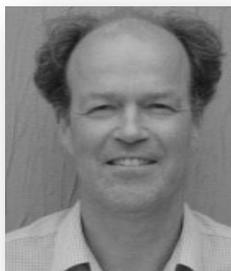

Roger FitzGerald
Architect and Partner, ADP

An architect with 30 years experience, Roger FitzGerald joined ADP in 1983 and became a Partner in 1991. As well as running the thriving London studio, he is Chairman of the practice and has overall responsibility for design quality.

His experience spans commercial, education, research, hotel, health, residential and leisure sectors. His higher education experience includes the landmark Augustine House at Canterbury Christ Church University, as well as student accommodation, master plans, conservation strategies and academic buildings.

His work has won a wide range of awards, been extensively published in books and journals, and exhibited at the Royal Academy. Roger is a Civic Trust Assessor and advises on the shortlisting of projects for the annual RIBA Awards. A keen artist, Roger's illustrative watercolours were published by Bloomsbury in a book entitled 'Buildings of Britain'. His paintings are now increasingly available online and in studios and galleries.

Peter Rands

Director of Sustainability Development, Canterbury Christ Church University

Dr Peter Rands is Director of Sustainability Development at Canterbury Christ Church University. He has been a member of staff at CCCU for 13 years, since his arrival in Kent in 1997. Initially working as Director of Computing Services, Peter took up his current position after working as Joint Project Director (Technology) for the construction of Augustine House Library and Student Support Centre - taking particular

responsibility for technical elements, interior layout and design, and all sustainability related developments.

Since 2009, Peter has played a leading role in driving forward the sustainability agenda within the University. During 2011 he led the CCCU Green Academy team, resulting in the successful 'Futures Initiative' project, which supports the development of futures thinking with staff and in the curriculum, and the development of education for sustainability. He is a Fellow of Sustainability Futures Leadership Academy and the Environmental Association for Universities and Colleges (EAUC) Membership Advisory Council.

Liz Jolly

Director of Library and Information Services, Teesside University

Liz Jolly is Director of Library and Information Services at Teesside University. Previously she was Associate Director (Services and Operations) in Information and Learning Services at the University of Salford. She has held departmental senior management positions at East London and London South Bank Universities and has also worked at Huddersfield, Leeds Metropolitan, Lincoln and Manchester Metropolitan Universities.

Liz is currently Vice-Chair of SCONUL. She is a Fellow both of the CILIP and the Royal Society for the encouragement of Arts, Manufactures and Commerce (RSA). A former Chair of the CILIP University, College and Research Group, Liz is a member of the Editorial Board of the New Review of Academic Librarianship and a member of the British Library Advisory Council.

Liz wrote the chapter 'Space: changing the boundaries' in *Collaboration in Libraries and Learning Environments*, 2013, Facet Publishing, edited by Maxine Melling and Margaret Weaver.

Elizabeth Traynor

Assistant Director (Library Services), Queen's University Belfast

Elizabeth Traynor began her career at Regent's College and the British Library in London before moving to Queen's University Belfast in 1994. She held several posts in Queen's before becoming Assistant Director (Information Services) in 2001.

She has been involved in two major new library building projects during her time in Queen's –both the Seamus Heaney Library which opened in 1997 and the McClay Library project where she was a member of the Project Implementation Group throughout the planning, design, construction and occupation phases between 2003 and 2009. She has continued to manage the Library Services Division during the subsequent period of significant change and service development which she will present during the event.

Neal Buchanan

Campus Librarian (Ayr), University of the West of Scotland

Neal has worked for the University of the West of Scotland since 2007 and has been the Campus Librarian at Ayr since 2008. He was Government Publications Librarian at Bell College, Hamilton in 2006 and prior to that worked in the Maps, Official Publications and Statistics Unit at Glasgow University Library. Neal's professional interests include social media and library support for academic staff and researchers.

Elaine Muir

Library Services Manager, SRUC

Elaine is a professional of 28 years standing, the past 18 of which she has spent with Scottish Agricultural College, which became SRUC in October 2012. She is Library Services Manager for SRUC and has a network of six campus libraries spread across Scotland, from Aberdeen in the north to Dumfries in the south. These libraries offer a range of services supporting the University's education, research, and consultancy divisions. SRUC has a long history of education and research into agriculture and applied sciences, its first constituent college being formed in 1899 by Glasgow University and what was to become Strathclyde University.

She previously worked in both schools and FE, and for a number of years represented Scotland on the CoFHE Committee of CILIP. She was also the Chair of Ayrshire Libraries Forum which worked towards sharing good practice across the sectoral libraries in Ayrshire.

**Withdrawing library stock?
Better World Books has a solution
that works for you.**

- Maximise revenues for your library as well as your nominated literacy partner.
- No book goes to landfill. We sell, donate or recycle every book.
- We supply FREE boxes and collections.

Laura Dunn	Head of Customer Services, Library	University of Liverpool
David Errington	Head of Learning Environment	Newcastle University

Assurance is the key

Your flexible partner for library cover

We provide experienced, customer focussed staff who deliver more than just security

- Weekend / late hours providing additional back up to library staff
- Access control
- Library patrols
- Lock down
- 24/7 cover during exam revision periods
- Flexible cover required? – 7 hours + – only pay for the hours you need to cover
- Customer Service – book collection, book shelving, photocopier, self-service machine maintenance, general student assistance
- We can provide staff to integrate with in-house library staff to provide reliable back up on a long term basis helping to cover vacation and sickness cover

A happy client

"Being able to rely on the staff for extra duties beyond being a security presence has enhanced our self-service"

Intelligent library solutions

A modern library is a dynamic environment with space to relax, meet colleagues, discover new ideas and foster personal development – alongside areas for the storage of books and archives.

Bruynzeel systems are designed with the modern library in mind. We are suppliers of shelving to the exceptional public libraries in Birmingham and Liverpool, and are proud suppliers to the Joint SCONUL 2013 award winners: Canterbury Christ Church University and Queen's University, Belfast. Clear, intelligent library solutions, providing the space you want and the storage you need. Effortless efficiency, for years to come.

www.bruynzeel-storage.com/canterburyuniversity

"Our vision was to create a space that was much more open. The shelving units have allowed us to maximise study space without reducing our storage capacity."

Pete Ryan –
 Head of Library Services
 at Canterbury Christ Church University

About SCONUL

SCONUL supports member libraries to deliver outstanding services to students, researchers and academics, thereby enabling their institutions to achieve excellence in teaching and research. We do this by working closely with those leading national and academic libraries of all missions, to share knowledge and best practice and to facilitate collective solutions where required. We speak for the community in its dealings with national and international bodies and promote the value that libraries bring to their institutions, their users and to the UK and Ireland as a whole.

SCONUL supports its members in six core ways:

Advocacy and lobbying

SCONUL represents the interests and views of academic libraries to national and regional governments, assemblies and other bodies and develops relationships with key partners.

Leadership

SCONUL helps shape public opinion in areas of interest to the sector; keeps members informed of new developments; facilitates new activities and brokers deals on behalf of its members. It provides information about developments in the models of leadership needed in our changing environment.

Communications

SCONUL facilitates the flow of information about and to academic libraries, and promotes best practice.

Services

SCONUL provides important services to members, including the Access Scheme and the SCONUL Statistics, and will continue to ensure that they are fit for purpose. We will also develop and operate new services as appropriate.

Training

SCONUL provides training seminars on core issues and helps identify emerging skills needs. We support and help develop the Future Leaders programme run by the Leadership Foundation for HE.

Events and networking

SCONUL organises events for those leading academic libraries and their senior management teams to provide them with opportunities to update their knowledge and share best practice with peers.

Our mission is delivered with the help of four Strategy Groups:

Academic Content and Communications Strategy Group

The Academic Content and Communications Strategy Group (ACCSG) helps shape policy and disseminate best practice in relation to the delivery of academic content. Priorities for the Group are supporting members with the introduction of Gold Open Access; working with Jisc and other partners on the market for journals and e-books and on Research Data Management; and supporting and representing the community on issues relating to copyright and intellectual property.

Last year, the Group published a briefing document for members on Open Access and responded to the government and HEFCE consultation on the issue. In addition, the Group lobbied government, and responded to policy consultations on copyright issues.

The ACCSG is chaired by Kitty Inglis, Librarian, University of Sussex.

Performance and Quality Strategy Group

The Performance and Quality Strategy Group (PQSG) leads on behalf of SCONUL members on issues related to benchmarking; value and impact; and in liaison with the Quality Assurance Agency (QAA). It also manages the SCONUL Statistics, and provides an extensive toolkit of data, measurement techniques and instruments in the field of performance measurement.

Recently, the Group delivered seminars on KPIs and benchmarking for libraries; and

responded to QAA consultations on Institutional Review. Currently it is undertaking a detailed evaluation of the SCONUL Statistics with an aim to propose changes at the 2014 AGM in Glasgow.

The PQSG is chaired by Alison Mackenzie, Dean of Learning Services, Edge Hill University.

Shared and Collaborative Services Strategy Group

The Shared and Collaborative Services Strategy Group (SCSSG) leads on the development and operation of shared services which will benefit SCONUL members, particularly those at a UK level which are devised, developed and delivered in partnership and which are community owned. The Group works closely with strategic partners including RLUK, Jisc, and UCISA.

The Group has produced a Shared Services Development Plan for the next five years, and has held a number of shared services events, including a symposium on shared services at a regional level and briefings on KUALI OLE and the Jisc LMS programme. An example of its collaborative work is the delivery of Knowledge Base+ (KB+). This project has now been developed into a new service, managed by Jisc Collections, which helps libraries manage their e-resources by providing accurate publication, subscription, licence and management information.

Mark Toole, Head of Libraries and Learning Resources, Nottingham Trent University, chairs the SCSSG.

User Experience and Success Strategy Group

The User Experience and Success Strategy Group (UESSG) leads on the input of academic libraries to the success of institutions and their users through activities related to, for instance, employability, information and digital literacy, and library design and space planning.

The experience of researchers and students is central to the work of this group, as the UESSG led on the Design Awards. In addition, the Group led on the content of the 2013 SCONUL Winter Conference, *International Students: strategies for supporting success*.

Liz Jolly, Director, Library and Information Services at Teesside University and Vice-Chair of SCONUL, chairs the UESSG.

Information about the work of all the Strategy Groups can be found on our website:

www.sconul.ac.uk/page/sconuls-strategy

The SCONUL Library Design Awards

About the Awards

There are many awards for buildings made by architecture and building organisations. The SCONUL award is distinctive in that it is made by a library body in recognition of newly-designed spaces which function effectively in meeting the needs of users and library staff and the demanding requirements of a modern learning and research environment. The award identifies and celebrates examples of best practice in the period 2009-2011.

The awards have been made every three years since 1973 and recognise the best in the design of HE academic libraries. Previous award winners include University of Leicester Library, Trevithick Library, University of Cardiff, and the Sir Michael Cobham Library at the University of Bournemouth.

The awards committee was impressed by the detailed planning of space to fit the strategic objectives of the institution, and to meet the needs of students, academics and, where applicable, the wider community. The impact delivered by the projects was remarkable and the enthusiasm with which the users spoke of their experience evidenced the excellent work of the teams at the libraries. The number of submissions and the investment in those libraries highlight the continuing relevance of the physical library space to students and academics in those institutions.

Judging was carried out by a SCONUL Building Design Group and was based on the following criteria:

Strategic relevance

- How does the development fit the organisational mission?

Design

- How does the design meet the objectives of the development?
- Evidence the creativity and innovation of design.
- How has the design facilitated service innovation?
- How does the design support accessibility?

Impact

- What has been the impact on the user experience?
- What impact has there been on service development and delivery?
- What impact has the development had on staff?

Efficiency and sustainability

- How has the development contributed to the efficiency and sustainability of the operation?

The winners

SCONUL is pleased to announce that the winners of the 2013 awards are:

Development over 2000 sq. metres

Joint winners:

Augustine House Library and Student Services Centre, Canterbury Christ Church University,
and
The McClay Library, Queen's University Belfast

Highly Commended:

The Forum, University of Exeter

Development under 2000 sq. metres

Winner:

Ayr Library, University of the West of Scotland and SRUC

Highly Commended:

Dame Elizabeth Esteve-Coll Learning Resource Centre, Kingston University

We would like to thank the SCONUL Building Design Group:

- Liz Waller
Deputy Director Information,
University of York
- Roisin Gwyer
University Librarian, University of Portsmouth
- Jo Norry
Director of Libraries and Learning Innovation, Leeds Metropolitan University
- Graham Walton
Head of Planning and Resources,
Loughborough University
- Helen Cocker
Head of Public Services Group, The London School of Economics & Political Science
- Lorraine Noel
Head of Customer Services,
University of Huddersfield
- Caroline Rock
Director of Library & Learning Support Services University of Surrey
- Cathy Walsh
Director of Library and Learning Services, University of East London

Augustine House Library and Student Services Centre, Canterbury Christ Church University

On 21 September 2009 Canterbury Christ Church University opened Augustine House, the new library and student learning centre on the Canterbury campus.

The new library is organised over four floors, with over 7,000 square metres of public space. It took two years to build, with over a decade of planning, consultation and research. The building is designed as open flexible space that will allow further reconfiguration to be undertaken as service and university needs change in the future.

The library was planned to be fit for purpose from the day it opened, but importantly it was planned and designed in order to be fit for future purposes. Whilst supporting the learning requirements of today's university is relatively straightforward to assess and deliver, how these needs will change in the future is not so easy to determine. The development of a clear vision and purpose for the new library was integral in

developing new and innovative solutions for today and tomorrow.

From the outset we concentrated on looking at the purpose of space within the library and how space is used to support the learning process. We wanted to create a library that had:

- integrated services
- integrated learning spaces which were multi-functional
- social learning spaces, including cafés
- a wide range of types of study zones
- services available beyond the standard university day, using self-service and self-help for users
- spaces that created a positive environment to support study and learning.

All of these elements were represented in the development of a clear vision and project brief for the development of a new library within Augustine House.

Whilst the project had ambitions to develop into new learning areas, we also recognised that it needed to deliver the full range of library services that were already offered. Students still wanted to use paper-based resources, such as books and print journals.

These physical items have considerable space requirements and created a potential conflict with the aspiration for open flexible study space. We took the decision to split the library stock into two parts: one area for regularly borrowed material located on open shelving at a low level to maintain an open feeling on each library floor; the other, with the less borrowed material, located in user accessible compact shelving, providing high density stock storage in a relatively small space. As a result the number of study seats across the library increased to over 1000 as compared to less than 500 in the old library building.

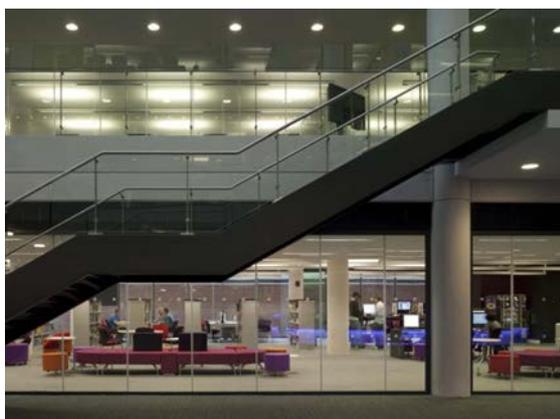

The planning for the new building concentrated on developing flexible spaces, where physical resources would not dominate with rows of books and computers. Rather the space should focus on supporting the users' study and learning needs. This flexible space was designed to create learning environments, or study zones, to support the increasing amount of collaborative learning across the University.

Different types of zones are provided on each of the floors, ranging from interactive spaces with access to

technologies such as whiteboards, large touch-screen computers and i-borrow notebooks, to bookable group study rooms. The variety of types of spaces are user-centred, as they can be configured and re-configured by users as they see fit, and has ensured that there is something for everyone looking to study within the building. Meeting the differing study and learning needs for different users was a key objective in transforming the learning environments within Augustine House – a challenge that has been met.

Computing technology in Augustine House combines fixed wired desktop machines alongside i-borrow laptops that can be borrowed and used throughout the building, using the ubiquitous wireless networking.

Mobile AV equipment allows users to create personalised learning spaces that can be changed again and again depending on users' study needs. In order to extend access to book loan services the University made significant investment into self-service technology to allow students to borrow and return physical library stock themselves.

Self-issue machines are provided on every floor of the building, with a large self-return sorter located on the ground floor close to the main entrance. In January 2014 over 85% of all loan and return transactions were directed through this self-service technology, which is available beyond the staffed library service hours. It has also released staff time to deal with more complex questions and problems, as well as supporting users in accessing the wide range of physical and electronic library resources.

Augustine House is a building, and a library, that focuses on the needs of its users – primarily students and staff within the institution, by providing space for interaction, conversation and learning. It offers a full range of library services in a state of the art, purpose-built building, plus a whole lot more!

Pete Ryan

The McClay Library, Queen's University Belfast

The McClay Library project at Queen's University Belfast was undertaken with the conviction that provision of a new library, more than any other development, would make the greatest contribution to advancing the University's ambition and search for excellence. This ambition included improving research performance and the student experience and joining the Global Top 100 Universities. The McClay Library has certainly delivered on University strategic objectives - a landmark building, modern yet timeless, designed by award winning architects, SBRA, constructed and furnished with the highest quality materials, it has become the focus for University visits from all over the world.

The McClay Library has replaced several branch libraries to become the main library on Queen's campus. The building is flexible and infinitely adaptable due to the creation of open plan spaces that can be re-configured easily, the use of raised floors, pervasive flood wiring and wireless connectivity. Internally, the building has a number of particularly creative and unique spaces – e.g. the CS Lewis Room, the Special Collections Reading Room and a variety of double height reading rooms.

The library offers a variety of high quality user spaces – silent study, PC whisper zones (integrated library/PC space rather than large banks of PCs), lounge seating, 23 group study rooms and a student lounge/café onsite for the first time. There are training rooms, language labs

and a large auditorium so that library training can take place onsite. Students are now close to stock and support services – previously, in an eleven storey tower, no staff support could be offered above Level 4! Subject Teams now manage enquiry desks based on each floor.

The opening of the McClay Library has facilitated a step change in terms of the library service. This encompasses everything from greatly extended opening hours to a massive increase in self-service – book issue and return, laptop loans, collection of reservations, group study room booking, fines payment, etc. Wireless provision and power to all desktops has facilitated laptop lending and BYOD which have proven extremely successful. Service enhancements continue with RFID tagging of the entire collection during 2012 and the installation of a book sorter in summer 2013. Opening hours have increased by 20% and continue to be extended incrementally. The huge growth in self service means that most options are available during extensive unstaffed opening hours (including Bank

Holidays when only security staff are onsite).

The user experience has been transformed across all service areas. The library is much more visible than before and centralisation of previously dispersed services, staff and stock has had a homogenising effect. In terms of working practices, the building has facilitated collaborative working, greater flexibility in terms of staff deployment both within and between teams and integrated service delivery. The fact that all service teams are co-located with Library Systems and Bibliographic Services has brought enormous benefits.

There has been innovation also in terms of support – e.g. development of study environment policies (a noise alert service and roving support) to enhance the student experience in an incredibly busy environment. Innovation has also occurred in conveying information to students through use of plasma screens to display real time updates on PC availability and group room bookings. There has been a massive increase in usage – footfall has more than doubled (students come more often and stay longer and a huge percentage of students from all Schools use the library regularly) while library membership and demand for access from students at other institutions has grown dramatically. The heavy use of the library has resulted in totally new patterns of pedestrian traffic across the campus and permanent new arteries have been created as a result.

Students have a new sense of ownership of the library - they provide continuous feedback, making active use of social media. The library is also the centre of choice for student fund raising and welfare activities.

Since the McClay Library opened, we have rationalised service desks and reduced staffing levels (while increasing opening hours and seeing many usage metrics soar); we have increased study seats and PCs with a further significant enhancement project in summer 2013 – a development which included an extended student lounge. The University is convinced of the

value of investment in library provision and the McClay Library service is now a key indicator of the student experience in Queen's.

The McClay Library has also contributed significantly to the sustainability agenda within the University. It is naturally ventilated with high efficiency heating (heat from the data centre is used in the

rest of the building), low voltage and movement sensitive lighting, rainwater harvesting, etc. The library has won a prestigious environmental sustainability award and achieved a Green Impact Initiative Gold Award after a major campaign to encourage recycling and energy saving activities throughout the building.

Ayr Library, University of the West of Scotland/ SRUC

The University of the West of Scotland (UWS)/SRUC library opened in August 2011 and is integral to the main campus building at Ayr.

The building – a single, secure, higher education learning space – sits on a riverbank in a lightly wooded environment near a residential area, below the treeline as observed from the houses. There are four levels, only two of which are visible from the main access road. The library is one of four UWS campus libraries, the others being at Dumfries, Hamilton and Paisley. SRUC operates library facilities at its campuses at Barony (Dumfries), Craibstone (Aberdeen), Elmwood (Cupar), King's Buildings (Edinburgh) and Oatridge (Broxburn). The creation of a purpose-built, modern, flexible library space for their use has clearly been popular with students: the SCONUL census data for the old UWS library showed an average of 30 users present during 2010/11 compared with 57 users in 2011/12 (an increase of 90%). Some of this increase will be down to SRUC students using the space, but the ratio of UWS to SRUC students at Ayr is approximately 9:1, suggesting that the students are indeed keen to use the new library. This is reflected in the borrowing statistics, which showed a 20% increase in issues in 2011/12 (45,849) compared with 2010/11 (38,197).

The library is in a prime location in the heart of the building, close to the

entrance and social spaces. It has been designed to be a welcoming and comfortable academic environment. Flexibility is of paramount importance because the UWS and SRUC client-base is diverse. Each of the three levels is zoned – quiet, social and group study – to offer different learning spaces to our users. The stairs and lift are situated to the far right of the library, which reduces intrusive flows of people and means the space is flexible and open, particularly at the entrance on Level 3. Accessibility was a key factor in the design process: all services are available to disabled users with minimal

need for adjustment; all pathways, including shelving aisles, are accessible for wheelchair users; height-adjustable desks and a rabami chair are available; there is level access from the main entrance of the building to the library; and staff support is available at the bespoke service desk situated near the library entrance, part of which is lowered.

The shared library space is an example in microcosm of the collaboration between the institutions. The UWS and SRUC librarians responsible for the site share an office and library assistants from UWS and SRUC work in an integrated space behind the service desk, where they share the desk rota (although acquisitions, ILL and other processes remain separate).

Joint staff meetings allow us to discuss and develop the service efficiently. Library staff from both institutions were fully involved in the design process and the desire from a service perspective is that, regardless of home institution, students received a seamless, high quality service from whichever member of library staff responds to their query. Students have

different needs, inevitably, but we strive to deliver an equitable service to all.

The flexibility of the space and comprehensive wifi coverage has encouraged library staff to be creative in their thinking about how the space is used: drop-in sessions, class-room teaching in the library, a roaming enquiry service with a tablet, a quiet reading space and a private tutorial room are all suggestions from library staff that could not have been implemented in our old libraries. UWS and SRUC's collaboration at this site has enabled us easily to share new ideas with one another and to collaborate on other projects, most notably the Rowan project, which sees a shared LMS (Millennium) between UWS, SRUC and the University of the Highlands and Islands (UHI). This went live in February 2013 and staff from SRUC and UWS have worked together throughout to consider the best solutions for our library services.

A popular aspect has been the introduction of group study rooms, which are used by students to discuss work or practice presentations in advance of assessments, and library staff for teaching purposes. The wifi coverage means

students may use their own portable devices to access library services anywhere they choose. The key issue is that the space is flexible: we aim to provide an appropriate space for our users, no matter how a student or group of students would like to learn.

The building won a Green Gown Award 2012 for Modernisation: Effectiveness and Efficiency in the Estate, and on completion achieved a BREEAM rating of Excellent.

About the Library of Birmingham

The Library of Birmingham includes an adult and children's library, study centre, music library, community health centre, multimedia, archives, Shakespeare Memorial Room, offices, exhibition halls, cafes and lounge space, roof terraces and a new shared auditorium (300 seats) with neighbouring Repertory Theatre. The library was designed by Dutch architects Mecanoo.

The building is designed to capture the imagination and provides a showcase for the library's collections and cultural programmes brought alive with the help of new digital technologies. This 'people's palace', as the lead architect, Francine Houben describes it, is a centre of excellence for literacy, research, study, skills development, entrepreneurship, creative expression, health information and much more.

All images by Christian Richters

The building is a contemporary space, but it owes much to the history of Birmingham and its libraries. Its delicate filigree skin is inspired by the artisan tradition of this once industrial city. The rooftop rotunda houses the Shakespeare Memorial Room, designed in 1882. This Victorian reading room is lined with wood from the first Birmingham Central Library. Its prominent position as a rooftop aerie makes this room visible from the square.

Although the library is a transparent building, it maintains energy efficiency through the buffering capacity of the building mass and the atria. Sun shading and reflective materials within the facades block the harsh rays of the sun during the height of afternoon while allowing natural daylight into the interiors. The circular patio cut out of the square creates a protected outdoor space and invites daylight deep into the building. The building incorporates a mixed mode and

natural ventilation strategy. The façade responds to external conditions and openings allow fresh air intake and outflow. The addition of soft landscaped roof spaces enhances the immediate

surrounding conditions. The Library of Birmingham was awarded BREEAM 'Excellent' status in 2013. BREEAM is the national standard against which the environmental sustainability of new buildings is measured.

Better World Books

Better World Books is a very innovative enterprise.

In a nutshell, we keep books out of landfill and support literacy by selling them on multiple online marketplaces. Our customers have made us the world's biggest socially responsible used bookseller. We are not a charity, but a pioneering social business – we donate a percentage of EVERY sale to literacy.

We work closely with libraries, many people don't realise that disposing of surplus books can be a huge issue – so our free service is pretty popular. Nobody likes seeing books thrown into skips! You're in the right place to find out more about how we work with libraries and with other groups who have surplus books.

Reassurance Security Services Ltd

Reassurance Security Services Ltd is a medium sized enterprise which has over 6 years' experience of working within the University sector.

During this time, we saw that there was a gap in the market to provide experienced customer focused staff, who deliver more than just security cover.

We now specialise in this sector and have created a niche market of providing an enhanced out of hours service for University Libraries.

We can provide flexible, efficient, cost effective and often bespoke services including:

- Weekend / late hours providing additional back up to library staff
- Access control
- Library patrols
- Lock down
- 24/7 cover during exam revision periods
- Flexible cover required –7 hours + – only pay for the hours you need to cover
- Customer Service – book collection, book shelving, photocopier, self-service machine maintenance, general student assistance
- We also provide staff to integrate with in-house library staff to provide reliable back up on a long term basis helping to cover vacation and sickness cover
